TOWN OF ROLLINSFORD

Map 2: Extent of Projected Tidal Flooding
Sea-Level Rise 1.7', 4.0', 6.3' + Storm Surge

Legend

- Extent of Sea-Level Rise of 1.7' with Storm Surge
- Extent of Sea-Level Rise of 4.0' with Storm Surge
- Extent of Sea-Level Rise of 6.3' with Storm Surge
- Approximate Mean High High Water Level

Sea-Level Rise Scenarios

Please note that the sea-level rise scenarios used in this assessment were derived from the Wake, 2011 report (refer to table of values below from this report). These scenarios were selected prior to the release of the Science and Technical Advisory Panel Report to the N.H. Coastal Risks & Hazards Commission, in August, 2014 [1]. While slightly different than the scenarios cited in that report, they yield coverage estimates that are within the mapping margin of error.

Map Description:

Base Features

- Municipal Boundaries
- Waterbodies
- Rivers and Streams
- Class I Trunk Line Highway
- Class II State Aid Highway
- Class III Recreational Road
- Class V Town Road
- Class VI Not Maintained
- Private

Data Sources:

- Data sets were retrieved from the NH GRANIT database, December, 2013. Digital data in the GRANIT database represents the efforts of the NH Department of Transportation, NH GRANIT, and other contributing state and federal agencies.

Prepared by the Staff of the Regional Planning Commission

Date: 12/7/2016

The Staff of the Regional Planning Commission prepared this report, as requested by the N.H. Coastal Risks & Hazards Commission. The C-RiSe project is funded by the National Oceanic and Atmospheric Administration under the Coastal Zone Management Act.
