

The Climate Risk in the Seacoast: Assessing Vulnerability of Municipal Assets and Resources to Climate Change (C-RiSe) project provides maps and assessments of flood impacts to infrastructure and natural resources in the coastal Great Bay region associated with projected increases in storm surge, sea level, and precipitation.

TOWN OF DURHAM

Map 5: Roads and Transportation Assets
Sea-Level Rise 1.7', 4.0', 6.3'

SLR Legend Impact Legend

Extent of Sea-Level Rise 1.7'

Extent of Sea-Level Rise 4.0'

Extent of Sea-Level Rise 6.3'

Approximate Mean High High Water Level

DOT Projects

Evacuation Routes

Impacted Urban Compact Area

Roads Impacted by Sea-Level Rise of 1.7 Feet

Roads Impacted by Sea-Level Rise of 4.0 Feet

Roads Impacted by Sea-Level Rise of 6.3 Feet

Disclaimer:
NHDOT projects were derived from various sources within the New Hampshire Department of Transportation and may have been updated at different times and with varying levels of accuracy. Given redundancies and the need to provide meaningful maps for planning purposes, SRPC generalized projects according to vulnerable areas. A more comprehensive list of impacted projects can be viewed within the community's vulnerability assessment chapter.

Sea-Level Rise Scenarios
Please note that the sea-level rise scenarios used in this assessment were derived from the Wake, 2011 report (refer to table of values below from this report). These scenarios were selected prior to the release of the Science and Technical Advisory Panel Report to the N.H. Coastal Risks & Hazards Commission, in August, 2014 [1]. While slightly different than the scenarios cited in that report, they yield coverage estimates that are within the mapping margin of error.

[1] Wake C.F., Kintner P., Huber M., Knutti K., and Stouffer M. (2014) Sea-level Rise, Storm Surges, and Extreme Precipitation in Coastal New Hampshire: Analysis of Past and Projected Future Trends, prepared by the Science and Technical Advisory Panel (STAP) for the New Hampshire Coastal Risks and Hazards Commission.

	2050		2100	
	Lower	Higher	Lower	Higher
Current Elevation of MHHW ^a	4.4	4.4	4.4	4.4
100-Year Flood Height	6.8	6.8	6.8	6.8
Subsidence	0.0	0.0	0.0	0.0
Elastic SLR	1.0	1.7	2.5	6.3
Total Stillwater Elevation ^{b,c}	12.2	12.9	13.7	17.5

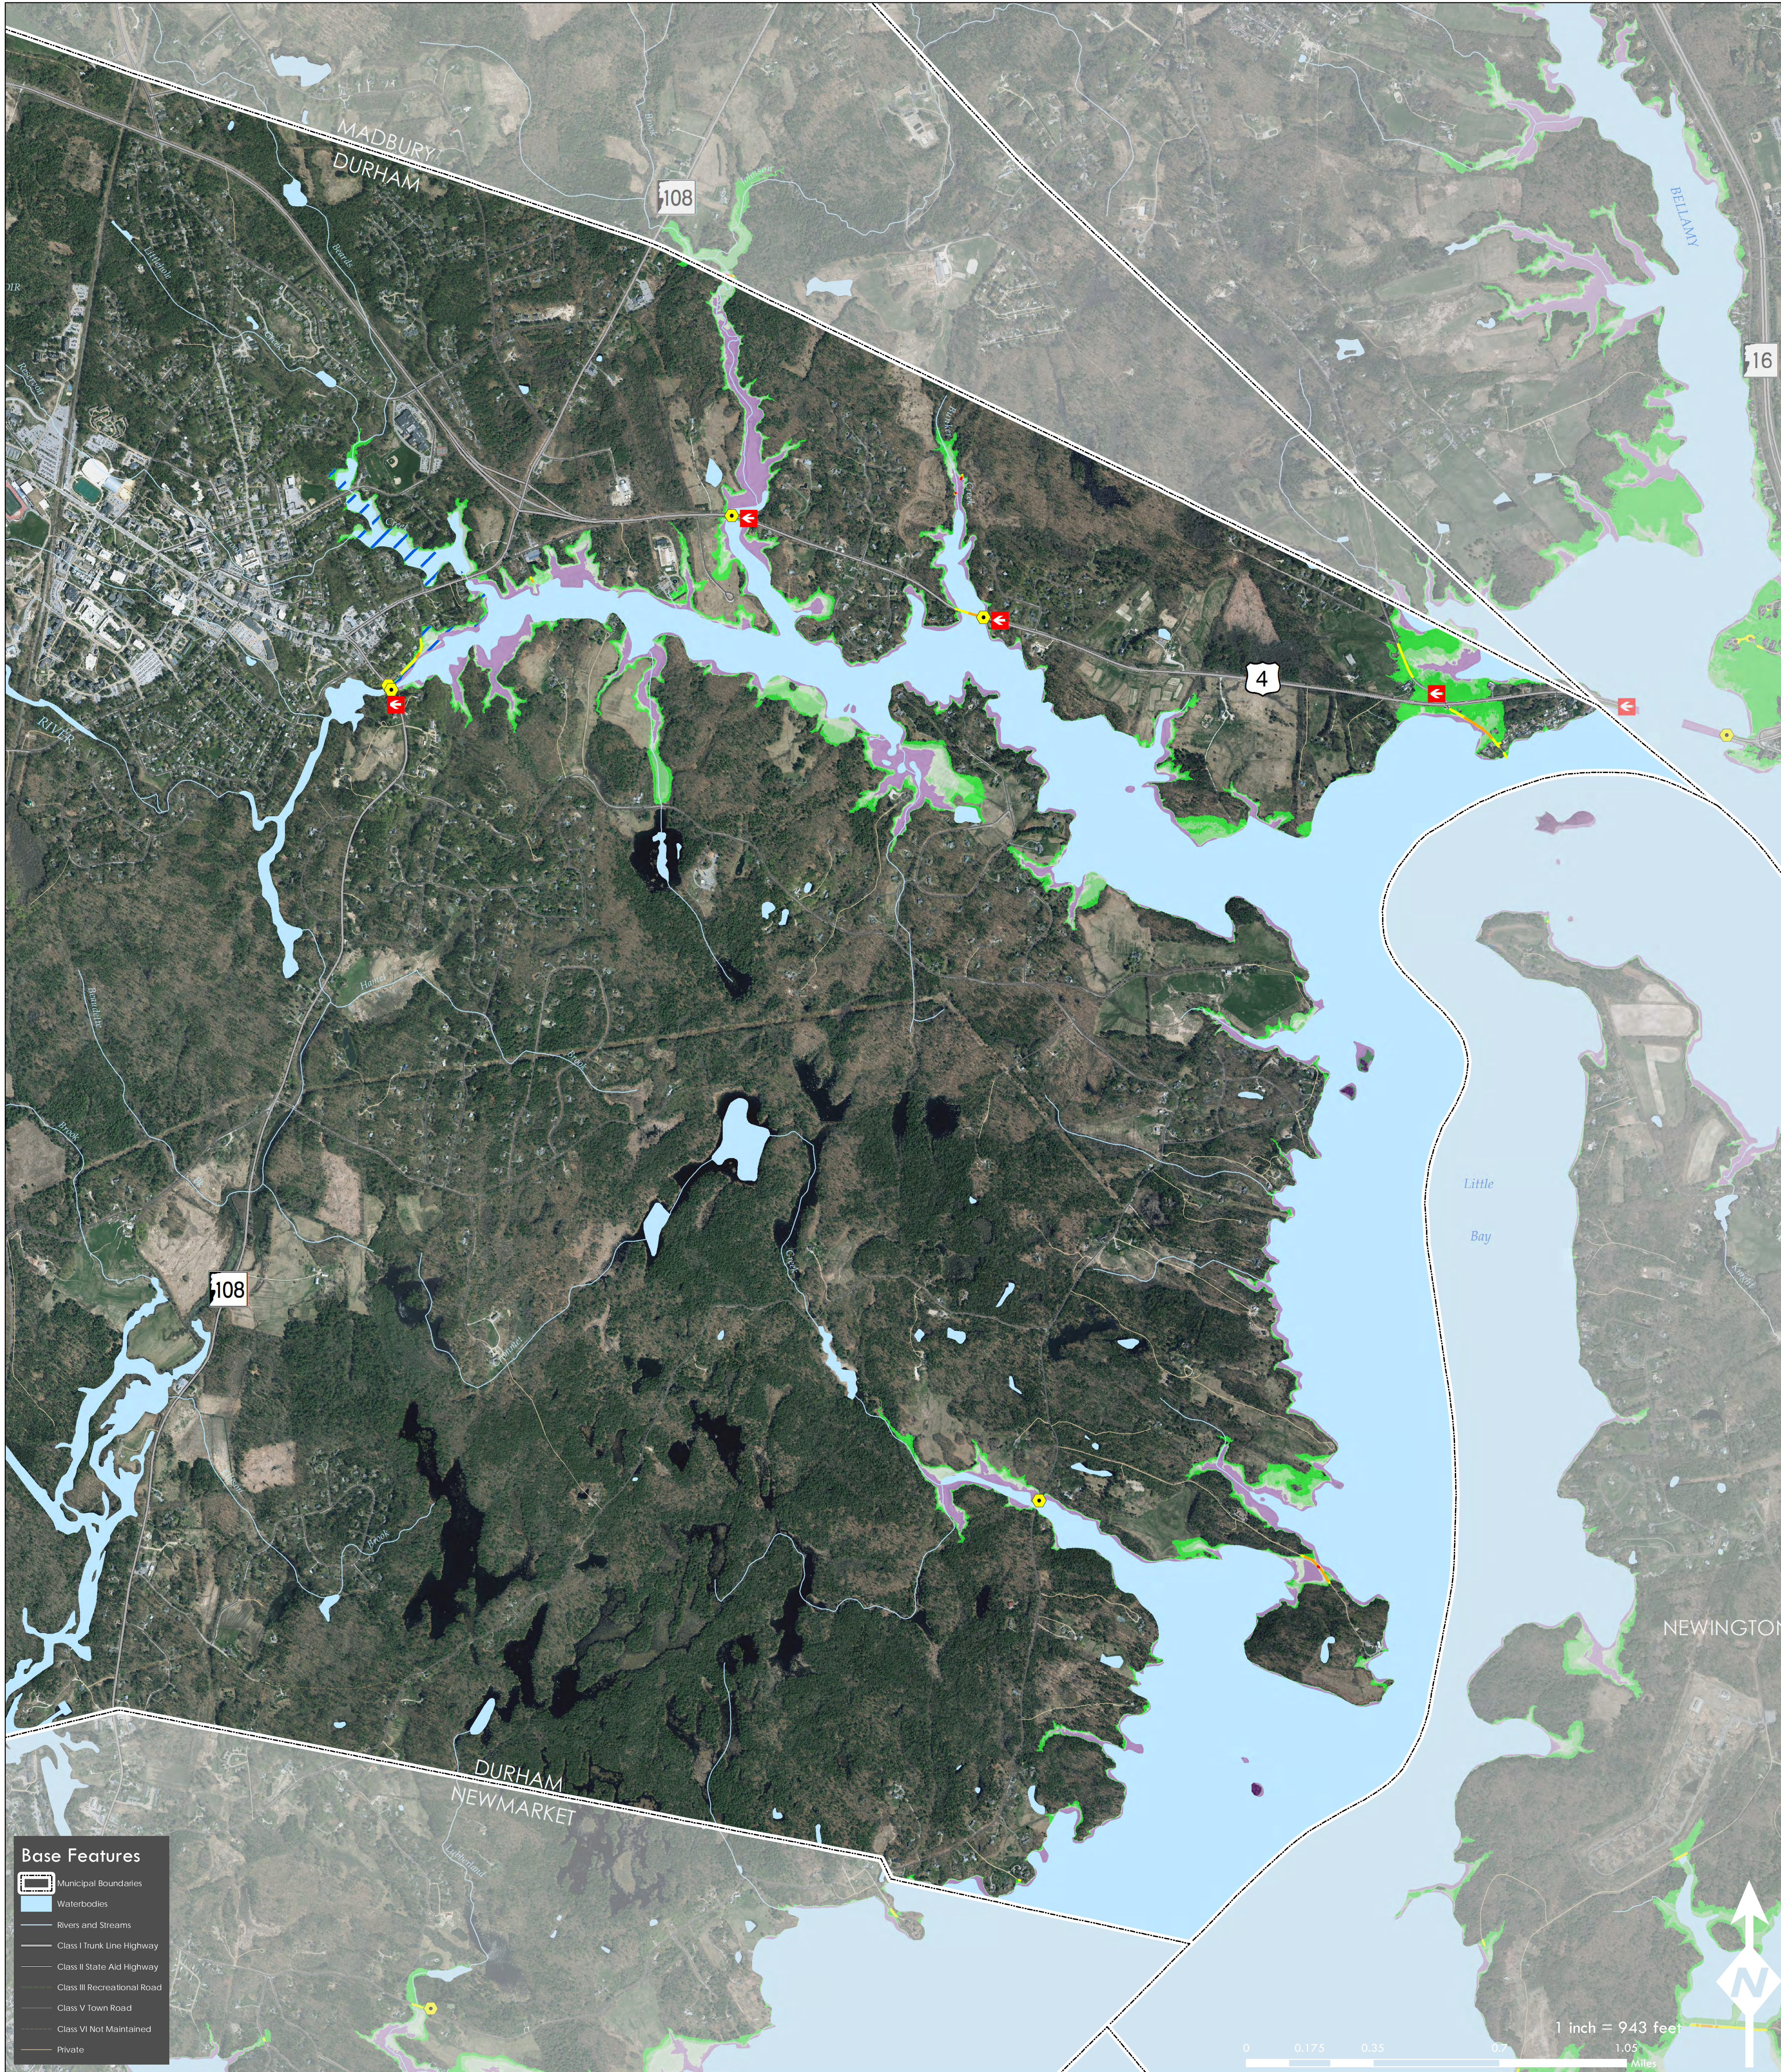

^a NAVD: North American Vertical Datum of 1988
^b MHHW: Mean Higher High Water at Fort Point, NH
^c Total Stillwater Elevation may not equal total of components due to rounding

Data Sources:
Data sets were retrieved from the NH GRANIT database, December, 2015. Digital data in NH GRANIT represent the efforts of the contributing agencies to record information from the cited source materials. Earth Systems Research Center (ESRC), under contract to the Office of Energy & Planning (OEP), and in consultation with cooperating agencies, maintains a continuing program to identify and correct errors in these data. Neither OEP nor ESRC make any claim as to the validity or reliability or to any implied uses of these data.

The C-RiSe project is funded by the National Oceanic and Atmospheric Administration under the Coastal Zone Management Act (CZMA) Enhancement Program. Project of Special Merit for FY 2015, authorized under Section 309 of the CZMA (16 U.S.C. § 1456b).

Base Features

- Municipal Boundaries
- Waterbodies
- Rivers and Streams
- Class I Trunk Line Highway
- Class II State Aid Highway
- Class III Recreational Road
- Class V Town Road
- Class VI Not Maintained
- Private

Road Asset Impacts: Town of Durham

Road Name	Road Class	Miles Impacted	Road Name	Road Class	Miles Impacted
Adams Point Road	Private	0.11			
Back River Road	Local	0.13			
Bay Road	Local	0.01			
Bunker Lane	Not maintained	0.01			
Cedar Point Road	Local	0.17			
Jacksons Landing	Local	0.01			
Newmarket Road	State	0.01			
No Name	Private	0.03			
Old Landing Road	Local	0.12			
Piscataqua Road	State	0.07			

State & Municipal Roadways (miles)

Roadway Type	Sea Level Scenarios		
	1.7 feet	4.0 feet	6.3 feet
State	0.00	0.03	0.08
Local	0.00	0.11	0.45
Private	0.00	0.10	0.14
Not Maintained	0.00	0.01	0.01
Total Road Miles	0.00	0.25	0.68

Other Transportation Asset Impacts: Town of Durham

Impacted Asset	Metric	Metric Impact	General Location and Name
Urban Compact Areas	Acres	17.9	Neighborhoods near Route 108 along Oyster River and Beards Creek
Evacuation Routes	#	3	Route 4 Route 108 Back River Road
NHDOT Projects	#	5	Bay Road over Great Bay Inlet Route 4 over Johnson Creek Route 4 over Bunker Creek Route 108 bridge replacement over Oyster River Route 108 bike shoulder construction

Note: Total miles impacted per road were calculated using the greatest sea-level scenario (6.3') extent.

Note: Total number of impacted assets were calculated using the greatest sea-level scenario (6.3') extent.
